

Magneti Marelli Fuel Pressure Regulator 3 Bar RPM40

Brand: Magneti Marelli
Product Code: RPM40
Availability: In Stock
Weight: 0.10kg
Dimensions: 5.00cm x 5.00cm x 5.00cm

Price: \$192.50

Short Description

Magneti Marelli / Weber 'button' fuel pressure regulator - 3 bar for use with any standard or aftermarket fuel injection system.

Description

The RPM series of regulators are designed for either direct mounting within the fuel rail, or in-line mounting using the RH01 regulator housing.

The regulator comprises a sealing valve joined to an elastic membrane which by means of a compression spring compensates the pressure within the regulator, hence, adjusting the fuel flow.

The body and cover are made from stainless steel, as are all internal components in contact with fuel, with the exception of the membrane which is a reinforced vulcanised rubber.

Technical Data

Weight 37 g

Flow range..... 5 > 300 l/h

Max vibration 30 g

Temperature range..... 0 > 100 °c

Filter mesh..... 150 µm
